

I am going to A Child's Voice.

A Child's Voice is a safe place for me to talk.

I will either be in building 216 or building 241.

Adults listen to me here.

Building 216

Building 241

The Lobby

I will walk into the lobby.

There are toys and books
in the lobby.

An adult will always be with me
in this room.

I can read, play or relax while I wait.

My parent or caregiver will
fill out paperwork.

I can have snacks here too.

The lobby is a safe place.

The Interview

I will go to a room where an adult at A Child's Voice will listen, get to know me, and ask some questions.

It is important to tell the truth.

I can ask the adult questions.

I can take a break at any time.

The cameras are there to help them remember everything I say.

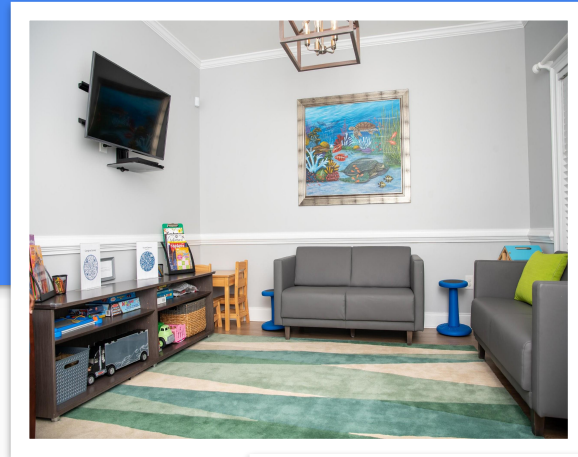

This room is a safe place.

Back to the Lobby

I may play here after my interview.

My parent or caregiver may talk with an adult in another room.

It is safe for me here.

The Medical Room

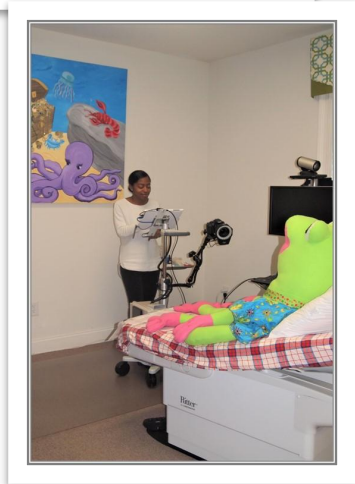

I may see a nurse practitioner at A Child's Voice for a check-up.

Another adult will help the nurse and take pictures.

The camera is there to help them remember everything they see.

The nurse will check my whole body and explain everything to me, so I feel safe.

I can ask the nurse any questions I have about my body.

The medical room is a safe place.

Back to the Lobby

After I see the nurse practitioner, the adults might talk in a different room.

I can play again in the lobby.

It is safe for me here.

Almost time to leave!

Before I leave, I will be asked if I would like a stuffed animal or coping kit.

Someone will walk me to the hallway to pick out a stuffed animal if I would like one.

The hallway is a safe place.

A Child's Voice is safe for me.

If I have questions, I can
ask someone when I arrive.
